

COLOR FLEX

Highly Flexible & Crack Resistant

Tested at over 120% elongation & 270 psi tensile strength

Color Flex is designed to use on cushion systems and flexible overlays 1/4" thick or greater. It's ideal for courts with substantial substrate movement and fabric crack repair systems.

✔ Advantages

- Reduce surface cracking
- Spider crack prevention with crack repair systems
- Both strong & flexible
- Easy application & squeegee pull

Available in Concentrate and Textured, upon request
